

# ISO 9001:2008 SYSTEM DESIGN & IMPLEMENTATION

In this time and age, being organized, systematic, and registered is the only scientific identifier of companies. **ISO 9001:2008** provides a set of rules that are internationally recognized as the way to achieving “Customer Satisfaction” and hence increasing profitability through fewer defects and waste of resources. These steps help your company save energy that otherwise could be wasted time and time again in performing the task on hand.

**Doing things right the first time and every time** is what **ALMAAS Food Safety Plus** professionals preach and practice. In fact, markets worldwide are becoming more strict and under pressure by end users who want the best value for their money, and are willing to shift manufacturers and service providers to do just that. The race is on.

## Who should use ISO 9001:2008

Attaining **ISO 9001:2008** certification gives you the edge you need over your competition, while getting things done at lower costs and higher profit margins. It also gives International recognition. The certificate provides your firm with the needed prestige to assist you in growing your local and export markets. It endows your brand with the quality label it deserves and automatically enhances the confidence level potential customers have in your products. **ALMAAS Food Safety Plus**, are here to help you achieve this important objective.
